

SELENIUM REVISION				- Keshav Potdar
Category	Command	Purpose	Example	
Browser	webdriver.Chrome()	Launch Chrome	driver = webdriver.Chrome()	
Browser	webdriver.Firefox()	Launch Firefox	driver = webdriver.Firefox()	
Browser	webdriver.Edge()	Launch Edge	driver = webdriver.Edge()	
Browser	driver.get(url)	Open URL	driver.get("https://google.com")	
Browser	driver.back()	Browser Back	driver.back()	
Browser	driver.forward()	Browser Forward	driver.forward()	
Browser	driver.refresh()	Refresh Page	driver.refresh()	
Browser	driver.close()	Close Current Window	driver.close()	
Browser	driver.quit()	Close Browser	driver.quit()	
Browser	driver.maximize_window()	Maximize Window	driver.maximize_window()	
Browser	driver.minimize_window()	Minimize Window	driver.minimize_window()	
Browser	driver.fullscreen_window()	Fullscreen	driver.fullscreen_window()	
Browser	driver.set_window_size(w,h)	Set Window Size	driver.set_window_size(1920,1080)	
Browser	driver.set_window_position(x,y)	Set Window Position	driver.set_window_position(0,0)	
Browser	driver.current_url	Get Current URL	driver.current_url	
Browser	driver.title	Get Page Title	driver.title	
Browser	driver.page_source	Get HTML	driver.page_source	
Browser	driver.current_window_handle	Current Window	driver.current_window_handle	
Browser	driver.window_handles	All Windows	driver.window_handles	
Locator	By.ID	Locate by ID	driver.find_element(By.ID,"id")	
Locator	By.NAME	Locate by Name	driver.find_element(By.NAME,"name")	
Locator	By.CLASS_NAME	Locate by Class	driver.find_element(By.CLASS_NAME,"btn")	
Locator	By.TAG_NAME	Locate by Tag	driver.find_element(By.TAG_NAME,"input")	
Locator	By.LINK_TEXT	Locate Link	driver.find_element(By.LINK_TEXT,"Login")	
Locator	By.PARTIAL_LINK_TEXT	Locate Partial Link	driver.find_element(By.PARTIAL_LINK_TEXT,"Log")	
Locator	By.CSS_SELECTOR	Locate CSS	driver.find_element(By.CSS_SELECTOR,"input[type='text']")	
Locator	By.XPATH	Locate XPath	driver.find_element(By.XPATH,"//textarea[@name='q']")	
	<XPATH Helpers>	// / @ text() contains() starts-with() normalize-space() last() position() and or		
Locator	find_element()	Single Element	driver.find_element(...)	
Locator	find_elements()	Multiple Elements	driver.find_elements(...)	
WebElement	click()	Click	element.click()	
WebElement	send_keys()	Type	element.send_keys("Admin")	
WebElement	clear()	Clear	element.clear()	
WebElement	submit()	Submit	element.submit()	
WebElement	text	Get Text	element.text	
WebElement	get_attribute()	Get Attribute	element.get_attribute("href")	
WebElement	get_dom_attribute()	DOM Attribute	element.get_dom_attribute("value")	
WebElement	get_property()	Get Property	element.get_property("checked")	
WebElement	is_displayed()	Visible	element.is_displayed()	
WebElement	is_enabled()	Enabled	element.is_enabled()	
WebElement	is_selected()	Selected	element.is_selected()	
WebElement	location	Element Location	element.location	
WebElement	size	Element Size	element.size	
WebElement	rect	Element Rectangle	element.rect	
WebElement	tag_name	Tag Name	element.tag_name	
WebElement	value_of_css_property()	CSS Value	element.value_of_css_property("color")	
WebElement	screenshot()	Element Screenshot	element.screenshot("img.png")	
Wait	driver.implicitly_wait(10)	Implicit Wait	driver.implicitly_wait(10)	
Wait	WebDriverWait(driver,10)	Explicit Wait	wait=WebDriverWait(driver,10)	
Wait	WebDriverWait(driver,10,poll_frequency=1)	Fluent Wait	wait = WebDriverWait(driver,10,poll_frequency=1, ignored_exceptions=[NoSuchElementException])	
Wait	<Explicit Conditions Examples>	EC.element_to_be_clickable() EC.presence_of_element_located() EC.visibility_of_element_located() EC.invisibility_of_element_located() EC.text_to_be_present_in_element() EC.element_to_be_selected() EC.element_selection_state_to_be() EC.number_of_windows_to_be() EC.title_contains() EC.url_contains()	EC.alert_is_present() EC.presence_of_all_elements_located() EC.visibility_of_all_elements_located() EC.invisibility_of_element() EC.text_to_be_present_in_element_value() EC.element_located_to_be_selected() EC.staleness_of() EC.new_window_is_opened() EC.title_is() EC.url_matches() EC.url_to_be()	

Dropdown	Select(element)	Create Select	my_dropdown=Select(ele)
Dropdown	select_by_visible_text()	Select Text	my_dropdown.select_by_visible_text("India")
Dropdown	select_by_value()	Select Value	my_dropdown.select_by_value("IN")
Dropdown	select_by_index()	Select Index	my_dropdown.select_by_index(1)
Dropdown	deselect_by_visible_text()	Deselect Text	my_dropdown.deselect_by_visible_text("India")
Dropdown	deselect_by_value()	Deselect Value	my_dropdown.deselect_by_value("IN")
Dropdown	deselect_by_index()	Deselect Index	my_dropdown.deselect_by_index(0)
Dropdown	deselect_all()	Deselect	my_dropdown.deselect_all()
Dropdown	first_selected_option	Selected Option	my_dropdown.first_selected_option.text
Dropdown	all_selected_options	All Selected	my_dropdown.all_selected_options
Dropdown	options	All Options	my_dropdown.options
Mouse	ActionChains(driver)	Action Class	actions=ActionChains(driver)
Mouse	move_to_element()	Hover	actions.move_to_element(ele).perform()
Mouse	click()	Click	actions.click(ele).perform()
Mouse	double_click()	Double Click	actions.double_click(ele).perform()
Mouse	context_click()	Right Click	actions.context_click(ele).perform()
Mouse	click_and_hold()	Hold	actions.click_and_hold(ele).perform()
Mouse	release()	Release	actions.release().perform()
Mouse	drag_and_drop()	Drag Drop	actions.drag_and_drop(src,dst).perform()
Mouse	drag_and_drop_by_offset()	Drag Offset	actions.drag_and_drop_by_offset(ele,100,0).perform()
Mouse	move_by_offset()	Move Mouse	actions.move_by_offset(100,50).perform()
JavaScript	execute_script()	Run JS	driver.execute_script("return document.title")
JavaScript	execute_async_script()	Async JS	driver.execute_async_script(...)
JavaScript	scrollIntoView()	Scroll Element	driver.execute_script("arguments[0].scrollIntoView()",ele)
JavaScript	window.scrollBy()	Scroll Page	driver.execute_script("window.scrollBy(0, 500);")
JavaScript	click()	JS Click	driver.execute_script("arguments[0].click();", ele)
JavaScript	setAttribute()	Set Attribute	driver.execute_script("arguments[0].setAttribute('value','abc')",ele)
Frame	switch_to.frame()	Enter Frame	driver.switch_to.frame(0)
Frame	switch_to.parent_frame()	Parent Frame	driver.switch_to.parent_frame()
Frame	switch_to.default_content()	Main Page	driver.switch_to.default_content()
Window	switch_to.window()	Switch Window	driver.switch_to.window(handle)
Window	new_window('tab')	New Tab	driver.switch_to.new_window('tab')
Window	new_window('window')	New Window	driver.switch_to.new_window('window')
Element Navigation	driver.switch_to.active_element	Active Element	driver.switch_to.active_element
Alert	switch_to.alert	Alert	alert=driver.switch_to.alert
Alert	accept()	OK	alert.accept()
Alert	dismiss()	Cancel	alert.dismiss()
Alert	text	Get Text	alert.text
Alert	send_keys()	Prompt	alert.send_keys("Admin")
Cookie	get_cookies()	Get Cookies	driver.get_cookies()
Cookie	get_cookie()	Get One	driver.get_cookie("token")
Cookie	add_cookie()	Add Cookie	driver.add_cookie({...})
Cookie	delete_cookie()	Delete Cookie	driver.delete_cookie("token")
Cookie	delete_all_cookies()	Delete All	driver.delete_all_cookies()
Screenshot	save_screenshot()	Page Screenshot	driver.save_screenshot("page.png")
Screenshot	get_screenshot_as_file()	Save File	driver.get_screenshot_as_file("page.png")
Screenshot	get_screenshot_as_png()	PNG Bytes	driver.get_screenshot_as_png()
Misc	driver.execute_cdp_cmd()	Chrome DevTools	driver.execute_cdp_cmd(...)
Misc	driver.set_page_load_timeout()	Page Load Timeout	driver.set_page_load_timeout(20)
Misc	driver.set_script_timeout()	Script Timeout	driver.set_script_timeout(20)
Misc	driver.print_page()	Print PDF	driver.print_page()
